

How To Use

You have to configure it from wp-admin > Contact > Add/Edit Contact Forms (Contact Form 7 needs to be activated before) to use this plugin.

You will find a new tab “Stripe” along with Form, Mail, Messages, and Additional Settings, where you can make all settings related to Stripe Extension.

Note: You need to add the “Stripe” tag in your form. You will find a tag “Stripe” along with text, email, URL, etc.

Check Below Screenshot:

The screenshot shows the Contact Form 7 editor interface. At the top, there is a title field containing "Stripe Payment". Below it, a blue bar displays the shortcode: `[contact-form-7 id="5" title="Stripe Payment"]`. The editor has several tabs: "Form", "Mail", "Messages", "Additional Settings", and "Stripe". The "Form" tab is active, showing a form template editor. A toolbar at the top of the editor contains various field types: "Stripe", "text", "email", "URL", "tel", "number", "date", "text area", "drop-down menu", "checkboxes", "radio buttons", "acceptance", "quiz", "file", and "submit". The main editor area contains the following HTML code:

```
<label> Your name
  [text* your-name "John Doe"] </label>

<label> Your email
  [email* your-email "john@gmail.com"] </label>

<label> Amount
  [text* your-amount "12"] </label>

[stripe* stripe-358 "Make Payment"]

[submit "Submit"]
```

Two black arrows point to the "Stripe" tab and the `[stripe* stripe-358 "Make Payment"]` line in the code.

Then go to the Stripe Tab and make all required setting as explain following.

Edit Contact Form Add New

Stripe Payments

Copy this shortcode and paste it into your post, page, or text widget content:

```
[contact-form-7 id="367" title="Stripe Payments"]
```

[Save](#)

To add a Stripe payment form to your Contact Form 7, find the setting attributes given below:

01 Enable Stripe Payment Form

Check the Stripe Payment Form option for Stripe submit button activation.

02 Enable Debug Mode

Check the Enable Debug Mode option to start transaction debugging.

03 Enable Test API Mode

This option will allow you to set the Stripe payment process in test mode.

04 Test Publishable Key (required)

This field is required when you have set Stripe mode for testing if your site is in test mode.

Get Your Publishable Key:

Get it from [Stripe](#) then Developers > API Keys page in your Stripe account.

05 Test Secret Key (required)

This field is required when you have set Stripe mode for testing if your site is in test mode.

Get Your Secret Key:

Get it from [Stripe](#) then Developers > API Keys page in your Stripe account.

06 Live Publishable Key (required)

This field is required to set Stripe mode to live if your site is in live mode.

Get Your Publishable Key:

Get it from [Stripe](#) then Developers > API Keys page in your Stripe account.

07 Live Secret Key (required)

This field is required to set Stripe mode to live if your site is in live mode.

Get Your Secret Key:

Get it from [Stripe](#) then Developers > API Keys page in your Stripe account.

08 Amount Field Name (required)

You have to set a name attribute to any of your fields of Contact Form 7 like drop-down menu, textbox, hidden field, radio buttons, etc., from which you need to pass amount value to Stripe website.

For example, [hidden price "20"] This is a hidden field with the name "price". You will need to set "price" in this Amount Field Name of Stripe tab.

09

Quantity Field Name (optional)

You have to set a name attribute to any of your fields of Contact Form 7 like drop-down menu, textbox, hidden field, radio buttons, etc. from which you need to pass the quantity of the item to the Stripe website.

For example, [radio quantity "1" "2" "3"] This is a radio button field with the name "quantity". You will need to set "quantity" in this Quantity Field Name of Stripe tab.

10

Customer Email Field Name (optional)

You have to set a name attribute for the text field of contact form 7 from which you need to pass the custom email of the customer to the Stripe website.

11

Description Field Name (optional)

You have to set a name attribute for the text field of Contact Form 7 from which you need to pass the description of the item to the Stripe website.

12

Select Currency

You can select your currency of Stripe here. There are 25 currencies supported in this plugin, and the default is set as AUD (Australian Dollar).

13

Success Return URL (optional)

You can enter the URL of the page to redirect for a Successful Stripe Payment transaction.

14

Cancel Return URL (optional)

You can enter the URL of the page to redirect if a transaction fails.

15

Customer Details

15.1

First Name

You have to select a name attribute for the first name field of contact form 7.

15.2

Last Name

You have to select a name attribute for the last name field of contact form 7.

15.3

Company Name

You have to select a name attribute for the company name field of contact form 7.

15.4

Recurring payment in stripe

To enable or disable recurring payment functionality form-wise in Contact Form 7.

You need to add the “Stripe Recurring” tag in your form. You will find a tag “Stripe Recurring”

You can modify the tag generator code to add the ID attribute and class attribute to your Contact Form 7 form using the “Stripe Recurring” tag. Here’s an example:

The front side shows the plan dropdown and amount of recurring.
