

## How To Use

You have to configure it from wp-admin > Contact > Add/Edit Contact Forms (Contact Form 7 needs to be activated before) to use this plugin.

You will find a new tab, “Worldpay,” along with Form, Mail, Messages, and Additional Settings, where you can make all settings related to Worldpay.

To add the Worldpay payment form to your Contact Form 7, find the setting attributes given below:

### 01 Enable Worldpay

Check the Worldpay option for Worldpay submit button activation.

### 02 Enable Worldpay Sandbox

This option will allow you to set the Worldpay payment process in test mode.

### 03 Enable Debug Mode

Check the Enable Debug Mode option to start transaction debugging.

### 04 Worldpay Installation ID (required)

Please enter your WorldPay Installation ID as it is needed to take payment.

Get WorldPay Installation ID:

**Step 1:** Login with the below link using your username and password

Link: <https://secure.worldpay.com/sso/public/auth/login.html?>

`serviceIdentifier=merchantadmin`

**Step 2:** To know the Installation ID, find the click [here](#)

**Step 3:** Use the Installation ID in Plugin setting and try to make payment.

### 05 Amount Field Name (required)

You have to set a name attribute to any of your fields of Contact Form 7 like drop-down menu, textbox, hidden field, radio buttons, etc. from which you need to pass amount value to the Worldpay website.

For example, [hidden price "20"] This is a hidden field with the name "price". You will need to set "price" in this Amount Field Name of Worldpay tab.

### 06 Quantity Field Name (optional)

You have to set a name attribute to any of your fields of Contact Form 7 like drop-down menu, textbox, hidden field, radio buttons, etc. from which you need to pass the quantity of the item to the Worldpay website.

For example, [radio quantity "1" "2" "3"] This is a radio button field with the name "quantity". You will need to set "quantity" in this Quantity Field Name of Worldpay Addon tab.

### 07 Customer Email Field Name (optional)

You have to set a name attribute to the text field of contact form 7 from which you need to pass the custom email of the customer to the Worldpay website.

### 08 Description Field Name (optional)

You have to set a name attribute for the text field of Contact Form 7, from which you need to pass the description of the item to the Worldpay website.

### 09 Select Currency

You can select your currency of Worldpay here. Default is set as AUD (Australian Dollar).

### 10 Success Return URL (optional)

You can enter the URL of the page to redirect after a Successful Worldpay Payment transaction.

### 11 Cancel Return URL (optional)

You can enter the URL of the page to redirect if a transaction fails.

### 12 Please follow the below steps to make the configuration changes in your Worldpay Merchant admin.

→ Log into your WorldPay Merchant Admin Interface

→ Under Installations, click Setup next to your Installation ID

- In the Payment Response URL field, enter “<wpdisplay item=MC\_callback>”
- Make sure the Payment Response option is enabled
- Make sure the Enable the Shopper Response option is enabled
- Save Changes button.
